

Different information search tasks are mentioned below:

Unspecified Task 1

Please carefully follow the instructions before initiating search task. Your goal is to find the information that is mentioned in the task descriptions. You will need to save documents that you find relevant to information search task. Use the interface feature to save the documents and in case if interface do not provide feature to download the document information in IEEE search interface, just download those documents that you found relevant.

“Task 1: For the research purpose your professor has asked you to conduct literature review on deep learning algorithms which are used for text classification in natural language processing. Also identify difference between all the algorithms used. Collect all the relevant research paper which will assist you in conducting literature review”.

Once you complete your task just type “complete” in zoom chat box.”

Unspecified Task 2

Please carefully follow the instructions before initiating search task. Your goal is to find the information that is mentioned in the task descriptions. You will need to save documents that you find relevant to information search task. Use the interface feature to save the documents and in case if interface do not provide feature to download the document information in IEEE search interface, just bookmark those documents that you found relevant.

“Task 2: For the research purpose your professor has asked you to conduct literature review on algorithms that are used to solve constraint satisfaction problems in artificial intelligence. Also identify difference between all the algorithms used. Collect all the relevant research paper which will assist you in conducting literature review”.

Once you complete your task just type “complete” in zoom chat box.”

Specified Task 1

Please carefully follow the instructions before initiating search task. Your goal is to find the information that is mentioned in the task descriptions. You will need to save documents that you find relevant to information search task. Use the interface feature to save the documents and in case if interface do not provide feature to download the document information in IEEE search interface, just bookmark those documents that you found relevant.

Task 3: “For classroom assignment your professor has asked you to collect information on dynamic programming and greedy approach in computer science domain and difference between them. Hence collect all the relevant research papers which can assist you to complete your assignment.

Once you complete your task just type “complete” in zoom chat box.”

Specified Task 2

Please carefully follow the instructions before initiating search task. Your goal is to find the information that is mentioned in the task descriptions. You will need to save documents that you find relevant to information search task. Use the interface feature to save the documents and in case if interface do not provide feature to download the document information in IEEE search interface, just bookmark those documents that you found relevant.

“Task 4: For classroom assignment your professor has asked you to collect information on encryption and decryption in computer security and differences between them. Hence collect all the relevant research papers which can assist you to complete your assignment.

Once you complete your task just type “complete” in zoom chat box.”
